ISO14001:2015 CLAUSE 5.2 – ENVIRONMENTAL POLICY

Founded in 2015 with the express intent of being 'Where Live Industry Lives', Production Park is now home to more than 20 live events businesses, 2 studios and a dynamic and creative cohort of over 200 students. It is an international destination of choice for technically challenging live productions and the only place on earth where that pioneering work is continually fed back into the educational ecosystem that will sustain our unique industry into the future.

The company is committed to protecting the environment from the significant internal and external impacts of its operations and will achieve this through the continual improvement of the environmental management system to enhance environmental performance.

Maintain an Environmental Management System to ISO14001:2015 Certification Standard

- Assess and manage the environmental impacts of our operations, considering a lifecycle perspective
- Comply with all relevant environmental legislation and other requirements to which the organisation subscribes
- Setting environmental and quality objectives and targets and review them to ensure continual improvement
- Encourage sustainable consumption associated with our activities to minimise unnecessary waste of electricity, fuel and materials
- Consider the environmental credentials of our contractors and source locally where practical
- Ensure all employees are aware of their responsibilities and are fully competent to control the activities for which they are responsible
